HI I'M TIMIEL

And I Say

Growing and perfecting your intuition can give you a powerful tool for making great decisions, minimizing self-delay and finding your purpose in life.
Understanding the value of intuition and avoiding the obstacles to experiencing your intuition fully are just the first steps. Nurturing your intuitive voice is the real challenge, but a challenge well worth the effort.

Answer these questions to gain a better perspective of how to use and grow your intuition and apply it to

your life.

1. What are the advantages that you believe you will gain through using my intuition effectively?

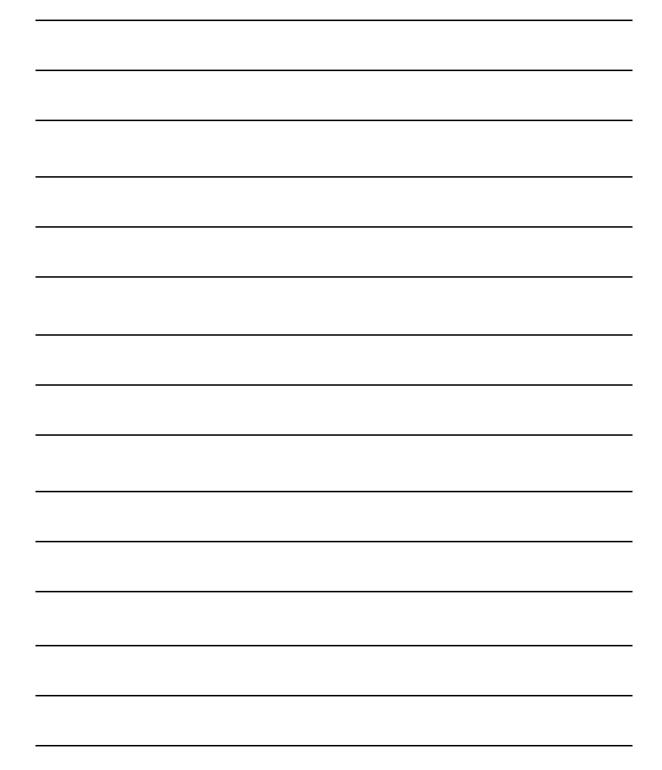

2. What are the obstacles you can see in your own life that could hinder your connection with your intuition? What is your plan for dealing with these challenges?

3. When have you failed to listen to you intuition and suffered for it? What was your intuition telling me? Why didn't you listen?

4. When have you been glad that you followed your intuition? What would have happened if you had ignored it?

5. How would you describe your decision-making process? In what ways would that process be improved by including your intuition?

6. What are three intuition-boosting exercises that you believe you could put into action in the near future? Which exercises would be the most challenging for you? Why?

7. Are you confident that you have found your purpose in life? Are you open to utilizing your intuition to search at a deeper level? What would finding a different purpose in life mean to you?
